NEXUS: THE POWER OF SIMPLE

You can't ignore hemorrhoids any longer

Hemorrhoids are the most common anorectal disease in the Western World, yet typically go untreated with only one in three patients seeking medical intervention. Many patients with grade I-III hemorrhoids find little relief in over-the-counter options, and do not want to undergo surgery. Their hemorrhoids are not going away and they're looking to you for a better solution.

The new inx Medical **Nexus™ Ligator with EasyFire™ technology is the easiest, most efficient and patient-friendly way to effectively treat hemorrhoids in your office.** It is the first non-surgical option that meets your needs—and your patients'.

The non-surgical hemorrhoid treatment that isn't so painful

Rubber band ligation is considered the gold standard for hemorrhoid treatment; however, the tools and technique have remained largely unchanged for more than 50 years.

inx Medical is redefining the treatment of grade I-III hemorrhoids with the Nexus Hemorrhoid Ligator with EasyFire technology. It is the only ligator that comes pre-loaded with four latex-free rubber bands. The intuitive and streamlined pistol grip design allows for quick and comfortable treatment of hemorrhoids without surgery.

The disposable Nexus System allows for rapid, one-handed deployment without any additional equipment, assembly or personnel. The design eliminates the need to manually reload the ligator, allowing the physician to treat single or multiple hemorrhoids at once. This results in a more efficient procedure, thereby increasing your practice productivity, and making the experience less embarrassing for the patient.

The Nexus System is the perfect design for physicians *and* patients.

Focus on your patients, focus on your future

Hemorrhoids used to be bothersome. However, treatment with the Nexus System can now benefit your patients and significantly enhance your practice revenue.

A patient-focused hemorrhoid treatment that offers a new way to expand your practice is a winning combination to help you survive and thrive in the new healthcare landscape.

Start expanding your patient care by expanding your hemorrhoid care. **Call 1-888-469-8558 today** for more information.

THE NEXUS WITH EASYFIRE ADVANTAGE

- ✓ The most streamlined hemorrhoid treatment option
- ✓ Pre-loaded bands with no assembly
- ✓ No additional personnel or equipment needed
- ✓ Dual action design with integrated suction and band deployment
- ✓ Latex-free rubber bands
- ✓ Completely disposable, eliminating the risk for cross-contamination
- ✓ Intuitive design supports rapid adoption and proficiency
- ✓ Single or multiple hemorrhoid banding during one procedure
- ✓ Non-disruptive integration into your practice
